

# Customer Notification

B-CN-340-EN REV A

January 11, 2024

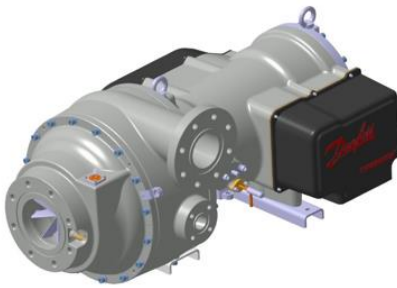

SUBJECT: VT Series Compressor Discharge Orientation

## Purpose

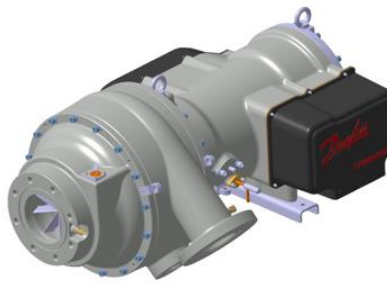

---

The purpose of this notification is to remind our customers that the VT Series Compressors can be ordered with discharge orientation options of 0, 45, and 90-degree rotations. It is imperative that the proper configuration be ordered. Refer to Figure 1 (Discharge Configurations) below.

## Figure 1 – Discharge Configurations

**Horizontal Discharge  
Rotated 0° (Standard)**

**Angled Discharge Rotated  
45°**

**Downward Discharge  
Rotated 90°**

**We do not permit any discharge modifications once the compressor has left our manufacturing facility. Any modifications made after it has left the Danfoss manufacturing facility will damage the compressor and will void the warranty.**

## Summary

---

VT Series Compressor discharge orientation modifications are **not** approved and will void the Compressor warranty.

## Action Required

---

If a unit needs to be converted, please contact your Key Account Manager for assistance with returning the compressor to Danfoss.

## Need Assistance

---

Please contact our Applications department by emailing [dtcapplications@danfoss.com](mailto:dtcapplications@danfoss.com) or your KAM should you have any questions regarding this notification.
