

Customer Notification

B-CN-028-EN Rev A

March 02, 2016

SUBJECT: TG Compressor Cover Finish Change

Purpose

The purpose of this document is to inform DTC customers of a change to the TG compressor cover finish.

These new TG compressor "green" covers will be **available immediately** and customers should begin to see these new covers for all future orders.

Summary

The current TG covers are made of plastic and have a custom paint process as a finish. The new covers will be made through a standard color infused plastic molded process. This molded process is identical to the current black covers for the TT Series.

Noticeable changes in current and new covers

The textural differences in the finish may be visually detected from the current to new covers. New covers have a high shine look and do not have a black color on the inside. Examples are shown in the pictures below.

The actual color of the TG "green" color (Pantone 363C) has not changed with this change in process.
