

Customer Notification

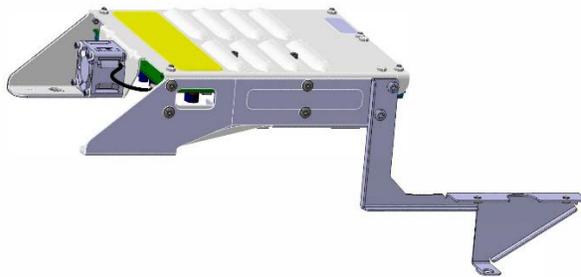

B-CN-113-EN Rev A

06/14/2018

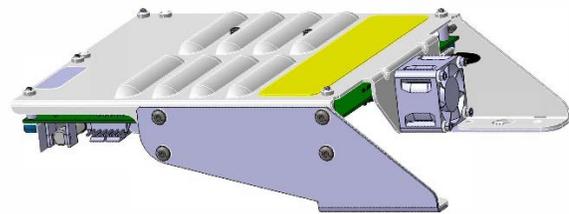

SUBJECT: Discontinuation of Reinforced Soft Start Variants

Purpose

The purpose of this document is to notify customers that effective immediately, Danfoss Turbocor is no longer providing a variant of the soft start having special reinforcement. This version of soft start is an older support configuration used in some specialty applications. **It has been determined that the current design of the soft start does not require any additional special reinforcement.**

Reinforced Soft Start

Soft Start Without Reinforcement

All affected spare part kits and some legacy compressor part numbers which included the reinforced version of the soft start are being discontinued. Any legacy compressor part numbers which are still available in a customer's price guide can still be ordered; however, they will have the standard soft start included as opposed to the reinforced variant.

Affected Compressors/Components

The compressors and spare part kits affected are listed in the table below:

Compressor PN	Model Type/Description	Voltage Package
110002-RF	TT300W-60TR-460-480V-60Hz	460V / 60Hz
110003-RF	TT300W-70TR-460-480V-60Hz	460V / 60Hz
110004-RF	TT300W-80TR-460-480V-60Hz	460V / 60Hz
100020-6	KIT_MODULE SOFT START, REINFORCED UPGRADE (400V)	400V
100020-7	KIT_MODULE SOFT START, REINFORCED UPGRADE (460V)	460V
100020-15	KIT_MODULE SOFT START, REINFORCED UPGRADE (460V)	400V
100020-16	KIT_MODULE SOFT START, REINFORCED UPGRADE (460V)	480V

Action Required

Customers should reference the current version of the spare parts guide in order to identify the appropriate replacement soft start kit, including replacement of any previously installed soft start kit having special reinforcement. Any affected legacy compressor part number which had used one of the discontinued soft starts has been replaced with a standard soft start and can still be ordered.

Need Assistance
