

Customer Notification

B-CN-282-EN Rev B

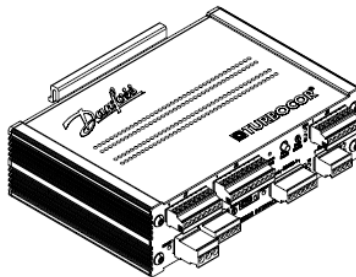

May 12, 2022

SUBJECT: VT Series Compressor Interface Module Obsolescence (Correction)

Purpose

This bulletin has been revised. The change has been highlighted.

The purpose of this bulletin is to notify our customers that we are obsoleting one of our VT Series Compressor Interface Modules (CIMs). The kit part number to be obsoleted is **110110**.

In our previous revision VT Series Spare Parts Book, we listed kit 110110 for VTT1200 compressors and 110110-1 for VTX1600 compressors. These two (2) different versions of CIMs were offered to accommodate two (2) different versions of firmware.

The same CIM can be used on both VTT and VTX compressors; therefore, two (2) different CIM kits are no longer required.

Summary

We will be obsoleting CIM kit 110110. Now, kit 110110-1 can be ordered for either the VTT1200 or the VTX1600 compressors. The latest production firmware will be installed prior to shipment.

Action Required

Order the **Compressor Interface Module kit 110110-1** for any VT Series compressor.

As a result of this change, the VT Series Spare Parts Manual has been updated and released as Revision C.3. Please reference this manual going forward.
