Bulletin | Danfoss Turbocor Compressors

Customer Notification

October 13, 2026

B-CN-476-EN REV A

SUBJECT: Turbocor Packaging Appearance Update

Purpose

This bulletin is to inform you of an update to the exterior cardboard packaging for Turbocor® compressors. This branding refresh features a new packaging appearance designed to improve visual consistency across our product portfolio while maintaining the high standards our customers expect.

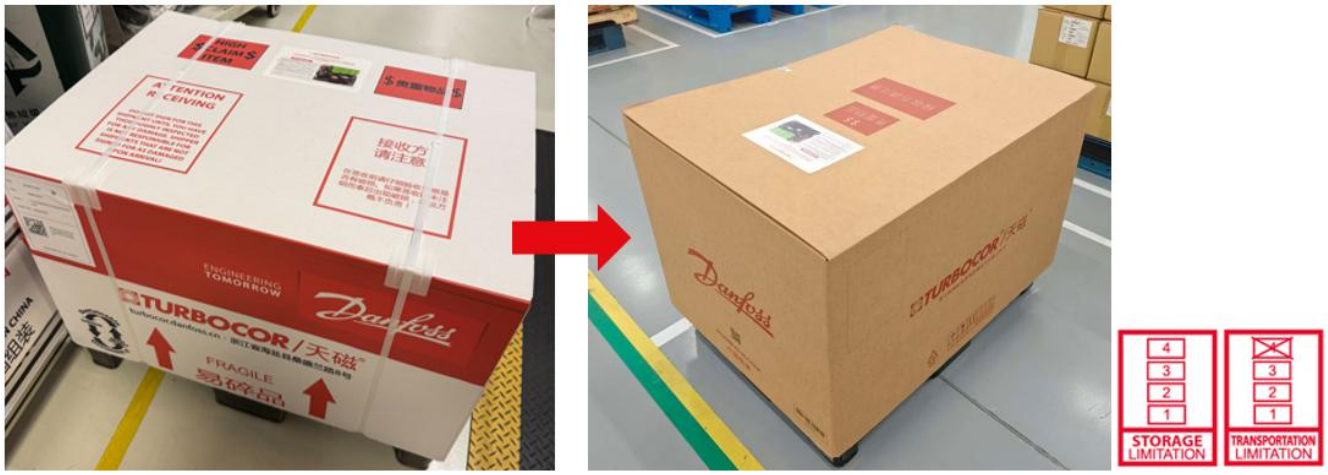

Summary

What Is New or Changing?

The external packaging graphics, labeling layout, and overall appearance have been refreshed to provide:

- Enhanced Danfoss brand presentation
- Updated packaging artwork and labeling elements in English and Chinese (where applicable).
- Storage and transportation stacking recommendations will now be printed on each box.
    - Packaging Stack Limits were referenced in bulletin **B-CN-456-EN Rev A TT/TG Compressor Packaging Stack Limits**

Figure 1 – Current white box and new natural box with stack limits

What Is Not Changing?

This packaging update is cosmetic only. There are **no changes** to:

- Product packaging dimensions
- Fit, form, or function of packaging
- Part numbers or ordering information (unless otherwise specified)

Customers can continue to use the product packaging exactly as they do today.

Transition Plan
Beginning October 1, during the transition period, you may receive products packaged in either the existing white box or the new natural cardboard packaging. Regardless of the packaging format, all products are identical, fully approved, and meet the same established quality standards.

Action Required

We request that you review your current inventory and ensure that all compressor boxes are stacked in accordance with these stacking guidelines. Your cooperation in adhering to these guidelines is crucial for maintaining product quality and ensuring a safe working environment.
