

Customer Notification

B-CN-376-EN REV A

September 27, 2024

SUBJECT: TT/TG/VT Series SMT Released

Purpose

This is to inform everyone that new **versions of the Service Monitoring Tool (SMT) for TT/TG and VT have been released to the website**. These updates address a minor change to correct an error in the previous versions.

Summary

TT/TG Series SMT version 3.6.2 and VT Series SMT version 4.14.1 have now been uploaded to our website and are ready for download. The only change to these applications was to correct an error that had been introduced in a recent release of the software.

The units of measure would not automatically update in the SMT when swapping from SI to US. Previously, the SMT would need to be disconnected and the reconnected to correct the issue. This issue had no effect on units being read by the PLC. This has been corrected and should no longer be an issue.

Action Required

The latest versions of our **Service Monitoring Tools (SMT)** are available on our website. Please navigate to www.turbocoroem.com and select **Compressor Software** to access the TT/TG and VT Series SMT.
