

Customer Notification

B-CN-359-EN REV A

April 16, 2024

SUBJECT: TT Series Compressor Cooling Fitting 100215 Obsolescence

Purpose

The purpose of this bulletin is to advise our customers that spare part kit 100215 has been obsoleted. This fitting was used on Major Rev -N, -P, -C, -D TT300 Compressors. The 10-year service period for these compressors has elapsed, and we will no longer offer this kit.

However, an alternate fitting can be sourced elsewhere if a replacement is needed. Spare part kit 100215 originally came with a strainer, but a strainer is not mandatory since a filter/drier is already required for the compressor cooling line configuration.

Action Required

When a replacement for 100215 is required, use Parker fitting P/N 48F-6-4 or equivalent. Below are the fitting specifications.

- brass 45° flare fitting
- connection 1 tube o.d. (inch): 3/8
- connection 2 thread size (inch): 1/4
- style: flare to NPT
