

Customer Notification

B-CN-403-EN REV A

June 11, 2025

SUBJECT: 380V Compressor Options for Nordborg

Purpose

This bulletin is to inform our customers that, on June 16, 2025, our **Danfoss factory in Nordborg, Denmark will be expanding its compressor offerings to include 380V options**. This enhancement applies to all current compressor models produced at the Nordborg facility.

This update reflects our continued commitment to meeting global voltage requirements and expanding flexibility for our customers.

Figure 1 – TGS and TTS Compressor Examples

Action Required

Customers may now place orders for 380V compressors configured at our Nordborg facility by selecting "E" (380V 50Hz) as the eighth character in the compressor Type Code.

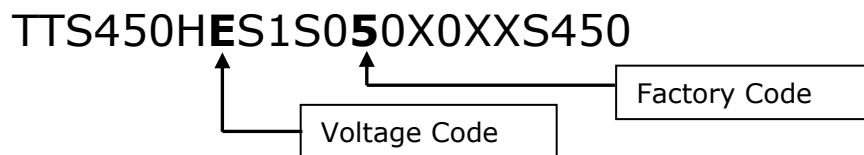

Figure 2 –Type Code Example

NOTE 1: Compressors with 4.2.0 and more recent software versions eliminated configuration options "D" and "J" for the voltage code because frequency (50 or 60Hz) can be selected in the software.

NOTE 2: Use factory digit options "4 - TLH" and "5 - HYN" for the appropriate core.

Need Assistance
